

## **Nurse Practitioner Opportunities** **Urgent and Primary Care Centers** **Victoria, Vancouver Island**

Island Health has exciting opportunities for Nurse Practitioners to work in the Victoria area at new Urgent and Primary Care Centers. We offer flexible schedules (part time and full time).

### **Large group of Family Practitioners and Nurse Practitioners in team-based care:**

- Join a team of primary care providers and other allied health staff that collectively deliver integrated team-based care to patients.

### **Turn-key operation in Victoria BC:**

- Located in beautiful Victoria, the UPCC's are bright new clinics, offering turn-key operation.

### **Group clinical service contract with competitive rates:**

- If you are a Nurse Practitioner looking to achieve a healthy work-life balance and have income security while establishing your practice on beautiful Vancouver Island, this may be the opportunity you have been looking for.

Island Health looks forward to supporting primary care providers and the health care team to provide innovative primary care services that are at the forefront of primary care improvement in BC. Modeled after best practices, primary care providers will have the opportunity to optimize data from the clinic information system to improve patient care.

There is a requirement to establish a minimum panel and, in some of our clinics, participate in urgent care. As the most responsible primary care provider, after hours' care for patients is inherent in the services. The Nurse Practitioner will participate in an after-hours call group, sharing after-hours coverage with other primary care providers (Family Practitioners and Nurse Practitioners) at the clinic.

For additional information, or to apply in confidence, please forward your letter of interest and CV to:
